AML Name Screening

www.sanctionscanner.com
Sanctions and PEP lists are growing and changing, and thousands of new news are published every day around the world. The dynamic nature of this data makes it difficult and insecure for companies to scan manual sanctions, PEP, and adverse media data. The obliged institutions are required to perform these scans as required by the regulations, but it has become quite painful to do this process manually. Sanction Scanner has an answer to alleviate the compliance pain of corporations. It is the AML Name Screening and Monitoring solution.

AML Name Screening and Monitoring tool allow businesses to perform AML control in seconds with real-time enforcement, PEP, and adverse media data from more than +220 countries.

With our Sanction & PEP Screening Service, businesses can meet global and local AML obligations and be protected from regulatory penalties. With our global sanction, PEP, and adverse media data, we offer solutions that meet the AML needs of businesses in every region of the world. We strengthen your business’ AML compliance globally and locally by developing our solutions according to Financial Action Task Force and European Union regulations.

Discover AML Name Screening
Global Sanctions & PEP Data
Perform your checks in thousands of sanction, PEP and wanted lists of +220 countries and detect all risks.
